## SESSION MODERATOR

PROF. YASER S. NATOUR,  
CCC-SLP, HAAD, JMH  
Associate Professor Faculty of Rehabilitation Sciences of the  
University of Jordan

## SPEAKERS

MAYOROV KIRILL, PhD

*"The implementation of nuclear medicine techniques allows to reduce mortality from cancer in in several times, as well as to take medical activities in the country to a new level"*

General Director of BEBIG LLC, member of the interdepartmental workgroup of the nuclear medicine technologies development under the Ministry of Health of Russian Federation, member of Independent Directors Association

GORELOV VICTOR, PhD

*"For many years, practicing treatment of prostate cancer, in localized tumors we definitely choose brachytherapy. This method is the gentlest – it has less complications and risks of the side effects. Furthermore, after this treatment a man in most cases retains the same quality of life that is not always possible after radical prostatectomy"*

Onco-urologist.  
Head of the Centre for Brachytherapy of Prostate at Federal Medical Biological Agency of Russian Federation/  
Clinical hospital №122 named after L. G. Sokolov, laureate of the prize of Government of St.Petersburg,  
member of Russian society of Onco-urologists, member of the American Association of Brachytherapists.

PROF. ZYRIANOV ALEXANDER, MD

*"According to various studies the effectiveness of brachytherapy, reaches the level comparable with open surgery, and 10-year disease-free survival averages 87%"*

Head of Department of Oncology with a course of radiation therapy of Tyumen State Medical University of the  
Ministry of Health of Russian Federation

PETROVSKIY ALEXANDER, PhD

*"Brachytherapy is a unique method, combining innovative technologies, excellent results and minimally invasive techniques"*

Oncologist, radiation therapist. Deputy Director of the Research Institute of Clinical and Experimental Radiology at Russian Cancer Research Centre, Associate Professor, Executive Director of the Association of Oncologists of Russia, member of the American society for brachytherapy.

MARKOV NIKOLAY, PhD

*"Brachytherapy is a modern method that is based on the innovation systems of dosimetric planning, ensuring the maximum effectiveness of treatment"*

Senior medical physicist, Member of Radtech Association (Association of organizations and professionals in the field of radiation technology) of Russian Federation
